HANDCRAFTED IN EUROPE

OUTDOOR COLLECTION // **SPRING 2014**

# OUR PHILOSOPHY. OUR PASSION. OUR PROMISE.

**In 1923, a Bavarian cobbler named Lorenz Wagner founded LOWA as a work and outdoor boot company.**

Nine decades later, LOWA is a worldwide brand, selling boots and shoes in over 40 countries. Yet we are still based in our small home village of Jetzendorf, Germany where we proudly produce the majority of our classic board-lasted boots in our clean and modern factory. In fact, 95% of our shoes and boots are made in Europe, under the world's most stringent manufacturing, environmental and labor regulations.

Over these nine+ decades, we have vastly expanded our scope, our technologies and designs and our vision of what's possible. The constant factor, our brand "DNA", is that we remain Bavarian cobblers with a stubborn insistence on making great shoes that embody fit, comfort and performance. We constantly strive to make our next collection even better than the last, so that a hike, walk, climb or run in a pair of LOWAs becomes a remarkably fine experience. This commitment is manifest in patented innovations such as our **FLEX® LACING** for more comfortable trekking; our **PU INJECTION MIDSOLE TECHNOLOGY** that allows us to dial-in just the right ratio of stability-to-weight in our ATC collection; our patented lasted **GORE-TEX®** lining that delivers wrinkle-free, blister-free waterproof/breathable comfort. It's a serious, almost century-long commitment to making the best outdoor footwear in the world. So when we talk about "fit", "comfort" and "quality," these are real words – not marketing fluff – words that represent literally hundreds of obsessed-over, proven details that go every LOWA. They represent our passion for our craft of bootmaking and our promise of excellence to you and your customers.

# LOWA AT 90

A HISTORY OF INNOVATION, RESPONSIBILITY, SUCCESS

## 20s

**1923**

Lorenz Wagner founds LOWA in Jetzendorf, Bavaria and begins making heavy brogues for daily wear. He and his brothers help support the business with their side business, the Wagner Orchestra.

## 30s

**1930**

LOWA outgrows its original small facility and opens its first factory.

**1933**

Lorenz becomes Jetzendorf's first mayor but is later replaced because of his lack of the loyalty to Hitler's government. During the ensuing war, the factory is forced to make footwear for the military, especially the mountain infantry.

## 40s

**1946**

LOWA resumes consumer footwear manufacturing and invests heavily in new machinery and personnel. Production booms in street shoes, mountain and ski boots, and LOWA's reputation grows.

## 50s

**1953**

First post WW II recession forces LOWA to declare bankruptcy. Lorenz's daughter Berti and a her husband Sepp Lederer step in to rescue the company. Throughout the 1950s, LOWA expands its offerings and begins sponsoring mountaineering expeditions.

## 60s

**1963**

Jim Whittaker, the first American to summit Mt. Everest, does it in a pair of LOWA mountaineering boots.

**1968**

LOWA becomes the official gear sponsor of the German Ski Team.

## 70s

**1970**

LOWA pioneers breakthrough manufacturing processes for ski boots—including PU injection molding—and product innovation such as the first vulcanized rubber soles.

## HANDCRAFTED IN EUROPE

LOWA headquarters  
Jetzendorf, Bavaria, Germany

LOWA Schuhe AG  
Interlaken, Switzerland

### 80s

**1983**

LOWA introduces the Trekker, which set the new standard for hiking boot fit and performance.

**1973**

LOWA shocks the ski boot world with the "Air" which used an air-cushioned inner boot that completely changed the way ski boots fit. LOWA jumps to #1 and celebrates 50 years.

**1988**

Sepp Lederer hands the corporate reins over to his son Stefan who continues the family's history of product innovation.

### 90s

**1992**

Werner Riethmann steps in as company leader.

**1993**

The Tecnica Group acquires LOWA and moves ski boot production to Italy. Jetzendorf remains home base for LOWA corporate, manufacturing and R&D.

**1995**

LOWA introduces light hiking boots, the forerunners of today's ATC category.

**1998**

First Renegade produced, still one of the world's best selling outdoor boots.

### 00s

**2000**

LOWA reaches a huge milestone – 1,000,000 pairs of boots sold in a year. Davo Kanicar, wearing Struktura AT boots, becomes 1st man to complete uninterrupted ski descent of Everest.

**2001**

Ines Papert wins 1st of her 4 [so far] World Ice Climbing Championships.

**2003**

LOWA marks its 80th Anniversary. It's become the largest employer in the Jetzendorf area, holding on to its roots while continuing to innovate.

**2009**

LOWA is awarded prestigious ISO 9001 status for highest quality manufacturing processes.

### 10s

**2011**

LOWA athlete Gerlinde Kaltenbrunner summits K2, becoming 1st woman to summit all 14 8,000m peak without supplemental oxygen.

**2012**

LOWA USA opens consumer demo centers at Sierra Club's Clair Tappaan Lodge (CA) and the Appalachian Mountain Club's Joe Dodge Lodge (NH).

**2013**

Still based in Jetzendorf, LOWA marks its 90th anniversary and celebrates with Bergfest, an all-day mountain festival in Bavaria. LOWA USA opens two more consumer demo centers at the Appalachian Mountain Club's Mohican Outdoor Center (NJ) and YMCA of the Rockies/Estes Park (CO).

## 2014 Outdoor Collection Highlights include:

- ▶ Expanded Alpine category with new styles in high altitude and mixed use mountaineering boots such as the new Expedition 8000 Evo RD, new Mountain Expert GTX® Evo, plus new collection of Rock Climbing shoes
- ▶ New rugged backpacking styles for above-tree line trips (Hunter GTX® Extreme Evo) and a new lightweight women's style (Lavena GTX®)
- ▶ Expanded Trekking category with new warm-weather styles, bright on-trend colors plus new styles (Hudsons) featuring vegetable-tanned (non toxic process) full grain leather
- ▶ Updated Renegades and new Tempest family including vented and mesh styles
- ▶ Expanded Speed Hiking category in modern lightweight designs and optics (Innox, Ferrox)
- ▶ Entirely new category: Casuals & Sandals for easy, breezy walking and warm weather activities
- ▶ Expanded KIDS collection features junior versions of our multi-sport styles (Innox GTX® Jr) plus fresh streetwise styles (Lenny)

In Action 2013

- Dealer Hikes
- New Consumer Demo Centers
- Retailer Events / Grassroots Outreach
- American Hiking Society Kids Coloring Contest
- Summit for Somebody Mt. Whitney / Big City Mountaineers
- Sierra Club Trip Leaders Workshops
- Social Media Growth
- Bozeman Ice Festival
- North Conway Ice Festival
- Oway Ice Festival
- Havi Berper Speed Climbing Contest
- Athlete Ambassadors

Weisshorn GTX®

### FOR PEAK PERFORMANCE

For those who risk their lives for the challenge and adventure of reaching the world's highest summit, alpine boots are truly survival gear. Our 2014 line is our most technical to date and features new designs that have been proven on the world's most punishing climbs by elite alpinists like Ralf Dujmovits and Gerlinde Kaltenbrunner. Key LOWA performance details include I-CORE® for lightweight stability underfoot; TI-ZIPS, to keep snow and moisture out and frostbite away; DURATHERM® & PRIMALOFT®, two proven insulation materials to ensure warm toes in subzero conditions; FLEX® LACING for walking and climbing comfort (it also allows alpinists to keep gloves on while lacing their boots.) On the ice climbing side, we've enlisted World Champion Ines Papert to help us develop new climbing boots, including the Latok GTX® that she tested at the 2013 Ouray Ice Festival under extremely frigid, mixed conditions.

Gerlinde Kaltenbrunner testing the new Expedition 8000 Evo RD on Denali (Mt. McKinley)

## DETAILS THAT MATTER

### I-CORE – a LOWA Exclusive

The I-Core carbon insert forms the intelligent core of the sole construction. A precise alignment of the carbon fibers with the lever arm achieves both perfect flex and torsional stability, for better shock absorption and comfort.

"I-CORE" stiff carbon insert

### I-LOCK – a LOWA Exclusive

A patented LOWA design, I-Lock is a cam lace loop placed at the top of the boot. It tightly holds the lace so the foot can be firmly held and supported while allowing for flexible shaft lacing. Pushing the hook clip upwards easily releases loosens the instep lacing.

### T-ZIP WATERPROOF CLOSURE GAITER

Found on the new Expedition 8000 EVO RD, Expedition 6000 EVO RD and the Latok XT. Keeps snow and ice out, warmth in, and provides extra protection from abrasion.

## EXPEDITION 8000 EVO RD NEW

Extreme high altitude insulated double boot designed in conjunction with renowned mountaineer Ralf Dujmovits. Reflective technologies to retain heat. High outside TI-Zip closure on Schoeller fabric gaiter for weather protection and durability. High wall rubber rand. Automatic crampon compatible.

<b>UPPER</b>	CORDURA® with Full-length TI Zip	<b>OUTSOLE</b>	Vibram® Teton
<b>LINING</b>	Aveolite, DURATHERM®, Alu-coated PE, Foam, 400 gram PrimaLoft® & GORE-TEX®	<b>STABILIZER</b>	6mm Nylon
<b>FOOTBED</b>	Insulate Pro Alu-Coated w/ Fleece	<b>WEIGHT</b>	2800 grams

ITEM #	COLOR	SIZES
230 062 7299	lime/black	5 - 12, 13 whole

## EXPEDITION 6000 EVO RD NEW

Designed for 6000m peaks. Double construction with insulation for warmth and reflective technologies to retain heat. TI-Zip closure gaiter for weather protection and durability. High wall rubber rand for durability against rock and gear. Automatic crampon compatible.

<b>UPPER</b>	CORDURA® with Full-length TI Zip	<b>OUTSOLE</b>	Vibram® Teton
<b>LINING</b>	Aveolite, DURATHERM®, Alu-coated PE, Foam, 200 gram PrimaLoft® & GORE-TEX®	<b>STABILIZER</b>	6mm Nylon
<b>FOOTBED</b>	Insulate Pro Alu-Coated w/ Fleece	<b>WEIGHT</b>	2600 grams

ITEM #	COLOR	SIZES
230 064 7299	lime/black	5 - 12, 13

## LATOK XT NEW

Vertical ice and low altitude expedition boot. Synthetic upper to save weight. Outer CORDURA® cuff with TI-Zip waterproof zipper. Insulated with Duratherm. I-Core in sole package for lightweight stability. Waterproof/breathable.

<b>UPPER</b>	CORDURA® with Full-length TI Zip	<b>FOOTBED</b>	Insulate Pro Alu-Coated w/ Fleece
<b>LINING</b>	DURATHERM® Insulation	<b>MIDSOLE</b>	PU
<b>TONGUE STUD/X-LACING</b>	Yes	<b>OUTSOLE</b>	Vibram® Dolent

## ROCK CLIMBING // ALPINE

The vertical rock climbing area is new to LOWA and helps us complete the Alpine category. Our approach to climbing shoes is to leave the rock star hype to others and just stick with what we know best: building fantastic shoes. We use top quality materials and branded components such as "Bio-Active", an anti-microbial lining, to keep feet healthy and odor-free, and VIBRAM®'s XS-grip for added performance. However, what is most important is what you don't see – it's what you feel. Our rock shoes have a slightly roomier toe box so you can wear the shoes on multiple pitches or all day long with no cramping. A heel pocket that pulls you back in and holds your heel like a good grip on a tennis ball. Performance and comfort: this is what our 90+ years of shoe making experience is all about.

## X-BOULDER NEW

A top performance shoe with a moderately aggressive downturn and extra stiff midsole that excels at steep and overhanging technical bouldering and sport climbing. X-style velcro closure for great foot hold.

<b>UPPER</b>	Microfiber	<b>MIDSOLE</b>	Extra Stiff
<b>LINING</b>	Bio-Active	<b>OUTSOLE</b>	VIBRAM® XS-grip
		<b>WEIGHT</b>	440 grams

ITEM #	COLOR	SIZES
430 112 3030	red/grey	5 - 12, 13

## RED EAGLE - LACE NEW

A top performance shoe with a moderately aggressive downturn and extra stiff midsole that excels at steep and overhanging technical sport and traditional climbing.

<b>UPPER</b>	Microfiber	<b>MIDSOLE</b>	Extra Stiff
<b>LINING</b>	Bio-Active	<b>OUTSOLE</b>	VIBRAM® XS-grip
		<b>WEIGHT</b>	440 grams

ITEM #	COLOR	SIZES
430 111 3030	red/grey	5 - 12, 13, 14

## RED EAGLE - VELCRO NEW

A top performance shoe with a moderately aggressive downturn and extra stiff midsole that excels at steep and overhanging technical sport and traditional climbing.

<b>UPPER</b>	Microfiber	<b>MIDSOLE</b>	Extra Stiff
<b>LINING</b>	Bio-Active	<b>OUTSOLE</b>	VIBRAM® XS-grip
		<b>WEIGHT</b>	440 grams

ITEM #	COLOR	SIZES
430 115 3099	red/black	5 - 12, 13, 14

## FALCO - LACE NEW

An all-around climbing shoe that is ideal for extended wear on moderate to difficult climbs with a slight downturn and LOWA's LC-SuperGrip® rubber compound

<b>UPPER</b>	Microfiber	<b>MIDSOLE</b>	Medium Stiff
<b>LINING</b>	Bio-Active	<b>OUTSOLE</b>	LC-SuperGrip®
		<b>WEIGHT</b>	480 grams

ITEM #	COLOR	SIZES
430 110 0740	green	5 - 12, 13, 14

## FALCO - VELCRO NEW

An all-around climbing shoe focused on comfort for extended use in the gym or on long moderate climbing days, with a slight downturn and LOWA's LC-SuperGrip® rubber compound.

<b>UPPER</b>	Microfiber	<b>MIDSOLE</b>	Medium Stiff
<b>LINING</b>	Bio-Active	<b>OUTSOLE</b>	LC-SuperGrip®
		<b>WEIGHT</b>	440 grams

430 100 6040	blue/green	5 - 12, 13, 14

## PIROL - KIDS NEW

A technical climbing shoe for kids and young adults that performs like an adult's climbing shoe, with a slight downturn and a soft midsole. Adjustable sizing through the heel tab.

<b>UPPER</b>	Microfiber	<b>MIDSOLE</b>	Soft
<b>LINING</b>	Bio-Active	<b>OUTSOLE</b>	Rubber
		<b>WEIGHT</b>	210 grams

ITEM #	COLOR	SIZES
440 110 0220	orange	28 - 36

## FALCO RENTAL - LACE NEW

Rental shoe based on the Falco Lace but with an extra thick outsole in the forefoot and toe and special durable rubber wear resistant toe rand. Adjustable sizing through the heel tab. Snap holds pair together for easy rental shop organization.

<b>UPPER</b>	Microfiber	<b>MIDSOLE</b>	Medium Stiff
<b>LINING</b>	Bio-Active	<b>OUTSOLE</b>	LC-SuperGrip®
		<b>WEIGHT</b>	520 grams

ITEM #	COLOR	SIZES
430 113 7030	green/grey	5 - 14

## FALCO RENTAL - VELCRO NEW

Rental shoe based on the Falco Velcro but with an extra thick outsole in the forefoot and toe and special durable rubber wear resistant toe rand. Adjustable sizing through the heel tab. Snap holds pair together for easy rental shop organization.

<b>UPPER</b>	Microfiber	<b>MIDSOLE</b>	Medium Stiff
<b>LINING</b>	Bio-Active	<b>OUTSOLE</b>	LC-SuperGrip®
		<b>WEIGHT</b>	440 grams

ITEM #	COLOR	SIZES
430 100 6040	green/grey	5 - 14

Lavena GTX® WS

## FOR THE LONG HAUL

When you carry a heavy pack over long distances, rugged terrain and through all kinds of weather, your back, feet and joints will appreciate the support and stability that LOWA backpacking boots provide. Modern performance technology combines with our 90+ years of boot-making expertise to make these boots supremely durable, supportive and comfortable. The new Lavena GTX® for women showcases our key technologies, with **FLEXFIT FLEX® LACING** for comfort across the top of the foot, **I-LOCK®** to allow different lace tensions on the foot and the shaft, **X-LACING®** to hold the **C4® TONGUE** in place, a durable **PU MIDSOLE** with a **VIBRAM® MASAI OUTSOLE**, which besides providing traction in snow and mud won't chunk out when scrambling over scree and rocks.

## DETAILS THAT MATTER

### C4® TONGUE – a LOWA Exclusive

The four main features of the “C4” Tongue noticeably improve walking comfort:

1. asymmetrical padding (thicker towards the outside of the foot)
2. recessed ankle areas (inside higher than the outside)
3. flexible curved insert towards the inside of the foot
4. soft edging on the upper end

### X-LACING® with TONGUE STUD – a LOWA Exclusive

Secures the tongue along vertical and horizontal axes, to help prevent blisters and pressure marks.

### PU VS EVA

We use Polyurethane (PU) on 95% of our midsoles. It's a terrific shock absorber, rebounds well, will last longer on the trail and offer better comfort. You will get two to five times the performance life compared to molded EVA midsoles. PU, whether we cement it to the boot like on a Backpacking boot or inject it as on an ATC shoe, has very little manufacturing waste and is a much cleaner product to work with.

# TICAM GTX®

A new school of thought in backpacking boot design featuring reduced weight, easy ankle flex and ease of lacing, all in a design that still maintains the stability underfoot that's necessary when slogging heavy loads over rugged terrain and long distances. Waterproof/breathable.

*Hudson GTX® Mid*

### THE HEART & SOLE OF LOWA

Trekking is a way of life for us in the Bavarian Alps. Here, trekkers usually stay on a trail that can often be steep and winding, rocky and muddy. A light pack with some clothing, water, snacks, a rain jacket and a camera may be all the weight a trekker carries because there's probably a village or mountain that awaits with a cold local beer, a home-cooked meal and a bunk if it's a multi-day trek. So we don't need trekking boots to be as heavy-duty as backpacking boots but they do need to offer lots of support, underfoot stability, plus comfortable flex at the ball of foot and ankle. Because it rains and snows in the Alps, many trekkers want waterproof/breathable boots (found throughout the category), but since European trekkers tend to keep their boots for years, we also offer leather-lined models that provide years of customized comfort once they're broken-in. Our new full-grain leather Hudson, in both GORE-TEX® and LEATHER-LINED options, is a perfect example of our philosophy: a modern trekking boot that combines superb comfort and support in a lightweight design.

## DETAILS THAT MATTER

### FLEX® LACING – a LOWA Exclusive

Special "Flex" uppers construction with free-moving, individually mounted lacing components helps reduce pressure along the instep and reduces pressure from below (plantar pressure) for increased walking comfort and a better fit.

### SPS DYNAMIC – a LOWA Exclusive

Featured in our Backing and Trekking boots, it provides support for comfortable long distance walking. TPU inserts within the softer PU midsole helps control and prevent over-pronation and supination.

(show illustration for last year's cat)

### BALANCE COMFORT FOOTBED

Breathable top layer combined with slow reacting foam provides instant customization, helps keep moisture away from boot, eliminates pressure points and minimizes friction.

## CAMINO GTX® FLEX NEW SIZE

The new benchmark for trekking fit and comfort. The upper is designed with LOWA Flex® lacing which allows the laces to easily pull through the ballbearing lace loops that are set on free moving tabs, reducing overall pressure against the foot. Waterproof/breathable.

UPPER	Nubuck	FOOTBED	Balance Comfort

## NATURE LINE // TREKKING

## LOWA'S NEW NATURE LINE® – A STEP IN THE RIGHT DIRECTION

LOWA is not an environmental company. We use raw materials, energy and create waste. However, there is a saying that a bird does not soil its nest and we take that seriously. In our case, our nest is Jetzendorf, the community we have called home for 90 years – so over the last decade, we have invested almost \$1,000,000 in machinery to clean the air and water that leaves our factory. The stream that runs along our factory property, whose water the cows drink from, stays clean. The crops that grow in the fields on the other side of the stream remain safe to harvest. Our thrifty Bavarian culture certainly helps; our packaging has been made with recycled paper for so long no one can remember when it wasn't. Many LOWA employees ride bikes to work. Others van-pool in company-supplied minivans.

We still can't call ourselves a "green" company – but we are trying to take lighter, greener steps wherever we can. Not long ago, we began to ask our suppliers about using more sustainably-produced materials. We found that the supply chain for "sustainable" materials was not there and even today, it's very rough. So, as a project, we challenged ourselves to re-work the Trekker & Lady Sport, the classic trekking boots that helped define our brand, using more sustainably-sourced materials. This project became our "concept car" Trekker Nature Line® & Lady Sport Nature Line® – a step in the direction we are asking our suppliers to take with us and a useful template for our own more responsible processes and products.

## NATURE LINE® HIGHLIGHTS

- > We use Heinen "Terracare"® full grain leather that is tanned in Germany under fair-labor standards with natural tanning agents (no chemicals), low water and low energy consumption.
- > Our glove leather linings are made with only plant-based tanning agents
- > Open cell cushioning foams provide comfort, breathability and are made with 16% palm oil
- > The insole is made in Germany under fair-labor standards primarily of natural materials and recycled raw materials
- > The VIBRAM® Ecostep rubber outsole is made from 20-30% recycled rubber
- > The ankle cuff is made with 100% recycled polyester and the laces with 98% recycled PET bottles.
- > Toe bumpers are made with a Thermoplastic PU and the percentage of renewable materials is between 30 & 90%

Testers who ventured off the beaten path loved the FOCUS (the QC is the women's version), calling it ideal for hikers who tackle technical terrain that requires precise footing. 'It had enough torsional stability to prevent my foot from rolling when sidehilling or misstepping on rocky trails near Steamboat Springs,' says a tester... 'It feels almost like a dayhiker, only stiffer, with moderate-load support that never felt clunky.' Another tester raves, 'The arch and ankle support helped me feel completely stable on uneven, off-camber terrain.' The relatively flexible soles offer superior connection with - and feel for - the ground, which along with the burly rubber toecap, made them great for scrambling. The low-profile PU midsole and full-length nylon shank gave testers enough support to carry to 40 pounds."

*Renegade Pro GTX® Mid*

## ALL TERRAIN COMFORT

LOWA's All-Terrain Collection (ATC) of boots and shoes are designed for the outdoorsperson who wants a great combination of function, comfort and durability for day hikes or shorter excursions. All LOWA ATC styles are built in Slovakia and feature injected polyurethane (PU) construction. We like injected PU because it lasts for many miles on the trail, is durable yet lightweight, rebounds well and offers superb support. Over the years we have learned to innovate with this PU injection technology and have developed our proprietary **MONOWRAP®** frames for added midsole and upper support and stability. LOWA ATC boots and shoes constructed with injected PU technology offer the right amount of all-day comfort in the outdoors without sacrificing stability and support.

A prime example of our lightweight ATC design philosophy is the Renegade GTX® Mid Pro – a special luxe version of our best-selling boot that's become synonymous with outdoor multifunction comfort and performance.

ATC

## DETAILS THAT MATTER

### BENEFITS of PU INJECTED TECHNOLOGY

- > Direct injection process creates a highly durable bond between the upper and sole that is virtually impossible to break
- > Completely waterproof construction
- > Reduced use of glue
- > No material "fatigue", very resistant to compression, cushions and rebounds well
- > Integrated stabilizer ensures long lasting support underfoot

### LOWA MONOWRAP® CONSTRUCTION – a LOWA Exclusive

This unique technology wraps the foot in a lightweight yet supportive PU frame, allowing us to reduce overall boot weight by using lighter-weight uppers while still maintaining lateral stability.

#### 1. Dual Density PU HEEL COUNTER

2. Full length stabilizer is embedded into injected midsole to protect and stabilize underfoot

3. PU MONOWRAP® and integrated PU midsole for shock absorption, durability

4. VIBRAM® EVO sole for sure-footed traction

## RENEGADE PRO GTX® MID NEW

*Bora – “Best in Class – 93 GI Rating– The Bora is a super stable shoe that is at home on aggressive, sporty terrain. It’s stiff enough to handle high mileage hikes and supportive enough to get you through the nastiest talus field. The Bora proved to be one of the most exciting boots in the test. It’s stiff enough to handle high mileage hikes and supportive enough to get you through a really nasty talus field, but its truly comfortable on smooth trails with a light pack. In a closely competitive test, this boot outshined all other boots like it.”*

*I wear these boots (Zephyr's) constantly; they have been my travel companions on trails in the east, to deserts in the west. I have 3 months of almost daily wear, not a blister, hot spot or complaint... I can hike, drive, run (not marathons they are boots) and explore, as well as got to dinner all in the same shoe. I love them..."*

In Action 2013

# SPEED HIKING // 2014

Innox GTX® Mid

## NEED LESS WEIGHT? MORE PERFORMANCE? NO PROBLEM

Power walk. Nordic walk. A long trail run. Fast-packing. There are lots of activities that call for shoes that will help you perform at your best you're moving quickly, be it for daily fun and fitness or for when you decide to go for it and bag a peak in a day with a pair of poles and a hydration pack. These are the situations that call for a pair of LOVA Speed Hikers. Our new Innox GTX®, in both mid and low-cut styles, is a case in point: We use lightweight synthetic uppers combined with injected PU MONOWRAP® midsole technology to create a very capable, modern high performance, lightweight shoe on a super-stable LOWA NXT platform.

## DETAILS THAT MATTER

### SYNTHETIC TEXTILE UPPERS

Ultra-lightweight synthetic textile uppers for support, durability in a featherweight package.

### STG 3D SOLE

STG 3D sole, found on our S-series styles, provides optimal stability and excellent shock absorption for trail running.

### LOWA NXT

The LOWA NXT sole is designed with speed hikers and fast packers in mind. Non slip traction and stability is combined with a speed-oriented tread pattern.

## INNOX GTX® MID NEW

Offers lightweight support with a wrapped upper on our injected PU midsole and PU MONOWRAP® frame construction for stability. Made with a NXT sole for traction and durability. Great for fastpacking. Waterproof/breathable.

<b>UPPER</b>	Synthetic	<b>MIDSOLE</b>	Dual Density PU midsolee

## SURE-FOOTED COMFORT MEETS STYLE

Need to grab a beer and don't want to look like you just stepped off the trail? Planning a trip where you'll be walking all day and want to be comfortable while looking good as you stroll through museums, parks and cobblestone streets? You can still get your favorite LOWA comfort in our new Casuals collection that features a street sneaker sole for ultimate aahh comfort. Our bright new palette brings street-smart color to the mix, just to keep things fun.

Outdoor sandals are a must in every active person's wardrobe and travel bag. Wherever warm weather activities take you, our new family of LOWA Sandals – available in both high quality, carefully finished leather as well as synthetic fabric uppers- will keep your feet airy and comfortable with anatomically molded footbeds and injected PU midsole technology with MONOWRAP® for a touch of support.

## DETAILS THAT MATTER –

High Quality, European Construction  
for Travel Shoes & Sandals

### NEW SNEAKER SOLE for TRAVEL SHOES (SHOWN HERE IN PHOTO)

Lightweight, flexible sole with great traction  
in a fashion-forward profile

### NEW SANDAL SOLE for SANDALS

Lightweight, flexible sole with great traction  
on both wet and dry surfaces

### INJECTED PU MIDSOLE TECHNOLOGY

Long lasting, great shock absorption and support

### MONOWRAP® FRAME CONSTRUCTION (SANDALS)

Reduces overall design weight, provides extra lateral support

### MESH LININGS (SANDALS)

Reduce friction, manage moisture

### LEATHER-TOPPED, ANATOMICALLY MOLDED FOOTBED (CERTAIN SANDAL STYLES)

Helps keep feet dry and comfortable in hot weather

### VELCRO CLOSURES (SANDALS)

KIDS // 2014

Innox GTX Lo Jr

## LOWA Kids

LOWA KIDS outdoor line was a new category for us last year and we saw real success when we placed this line with the right dealers. It's true, LOWA KIDS shoes do cost more but we think they're worth it and savvy dealers and parents alike agreed with us. Our KIDS shoes are made to the same specs as our shoes for adults, with high quality leathers, branded components and technology such as injected PU midsoles and MONOWRAP® frame construction. Special kid-friendly features like toe and heel bumpers let kids scramble, hike, bike and skateboard to their hearts' content with nary a scratch to the shoes. Growing feet stay comfy, supported and dare we say it, stylin'. In fact, parents tell us that our shoes are so well made and stay looking so good that they can easily pass them onto other kids within the family or to friends. Oh, and of course they're made in Europe.

## DETAILS THAT MATTER – Growing Feet Need Great Shoes

### PATENTED LASTED GORE-TEX®

Patented lasted GORE-TEX® waterproof/  
breathable lining to keep kids' feet  
comfy, dry and blister-free

### PU INJECTED MIDSOLES

PU Injected Midsoles for non-stop support & cushioning,  
absolute waterproof bond between uppers and outsole

### STG OUTSOLE

STG outsole for nimble, fast paced activities

LOWA boots are warrantied to be free from defects in workmanship and materials for a period of 12 months from the date of purchase. Your exclusive remedy for break of such warranty is repair or replacement of your LOWA boots at LOWA's discretion. If your LOWA boots need repair or replacement due to defect in workmanship or materials, simply return them to the LOWA dealer where you purchased them. You will need proof of purchase. Make sure that your return request falls within 12 months from the date of purchase.

- See our website at [www.lowaboos.com](http://www.lowaboos.com) for directory listing of our dealers and warranty FAQ's. Please note that fit, paint thinner and lawn chemicals void the warranty.
- "Fit" is not covered in the warranty. You do the fitting, not us!

All product weights are based on men's 9 and women's 6.5. Color and product details subject to change. Actual colors may vary from printed catalog.
